Screenball®
migliora l'immagine del tuo ambiente

NUOVE FINITURE SCREENBALL - FORMULE INNOVATIVE PER LA FONOASSORBENZA E GRANDE CAPACITÀ DI ARREDO.

La pannellatura Screenball® appare come superficie dogata cromaticamente di alto effetto, piacevole al tatto, adattabile agli spazi secondo il desiderio e le necessità del progettista. Infinite sono le sue possibilità di finiture: dalla riproduzione di tutte le essenze lignee - dall'abete al faggio, dal wengè al noce - ad effetti di estrema eleganza e raffinatezza, come arabeschi floreali, efflorescenze decorative astratte, texture geometriche in ogni possibile resa cromatica.

La qualità primaria dei pannelli - l'attenuazione delle onde sonore a lunga riverberazione - si sposa quindi con un elevato valore arredativo, per creare ambienti in cui il benessere dell'abitare è completo.

Screenball®

pannello fonoassorbente
in Medium - Density Fiberboard

Disponibile in qualsiasi tipo di finitura
di superficie: carta melamminica,
laminati plastici, tranciati di legno
o precomposti di legno, laccati RAL
